## POP® BRAND RIVETS

## POP® BRAND RIVETS ARE THE BEST RIVET ON THE MARKET!

POP® Open-End rivets are hollow blind rivets pre-assembled onto a headed pin or mandrel. When set, POP open-end rivets resemble conventional tubular rivets, but unlike tubular rivets, the mandrel head is retained within the body of the rivet. These large-flange rivets give wide load spread, and are available in aluminum. Providing strong, low-cost fastenings, POP open-end rivets do well in most industrial riveting applications where materials to be fastened do not have high load-bearing requirements.

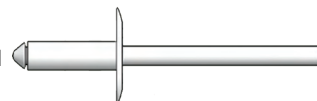

THE BEST QUALITY! MADE IN THE USA!

## ALL BRAKE PEDAL ASSEMBLIES NOW COME WITH ADJUSTABLE PEDALS

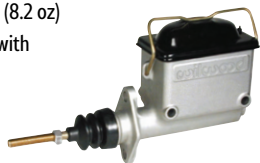

**Tru-Bar Pedals** utilize a fixed trunion bearing in the pedal arm, with spherical rod-end bearing push rod attachments. They provide ultimate precision, control, and adjustment of brake bias on race prepped vehicles. The Tru-Bar pedals utilize the same chassis and master cylinder mounting as all Wilwood balance bar style pedals. A stronger and larger diameter 7/16"-20 bar provides quicker adjustment.

**Tru-Bar Conversion Kit** includes the Tru-Bar Brake pedal & trunion assembly with the appropriate hardware to retrofit earlier design forged or cast pedal assemblies with standard balance bars. Included with this assembly: trunion, clevis hardware required in the conversion.

## STANDARD MASTER CYLINDERS

**WILWOOD**

- High pressure die-cast from high-grade aluminum
- Highest fluid capacity of any integral reservoir design (8.2 oz)
- 1.43" of piston stroke offers extra margin when used with large piston calipers
- Formed steel lids with bellowed type gaskets to keep moisture out
- 1/8" NPT

PART#	DESCRIPTION	PRICE
WIL260-6764	3/4" Bore	\$69.99
WIL260-6765	7/8" Bore	\$69.99
WIL260-6766	1" Bore	\$69.99

## COMPACT REMOTE MASTER CYLINDERS

**WILWOOD**

- Designed for limited space applications that require the output capacity of a full size MC
- The ultra-short 3.37" compact body provides 2.16" of additional clearance between the mounting flange and the fluid outlet
- A full 1.12" of piston stroke meets or exceeds the stroke capacity of most full size MC
- Kit includes: MC body, "Shorty" (7 oz.) reservoir, standard (10 oz.) reservoir, base clamps & hardware for remote reservoir application

- Takes #8 ORB (o-ring boss) fitting for inlet and outlet

PART#	DESCRIPTION	PRICE
WCD899	Bypass Fuel Pressure Regulator	\$129.99

### WILLY'S LOAD RELATED FUEL REGULATOR

- Anodized billet aluminum construction automatically adjusts fuel pressure according to manifold vacuum
- At idle or deceleration, when manifold vacuum is high, regulator opens and drops fuel pressure for clean restarts and keeps carburetor from flooding or blubbing in corner
- As throttle is opened, manifold vacuum drops which closes regulator and raises pressure for proper straightaway fuel mixture
- Easy installation - requires fuel return line and vacuum port (base plate or intake manifold) Kit includes everything needed for gas or alcohol, belt-drive or mechanical fuel pumps.

PART#	DESCRIPTION	PRICE
WCD890	Load Related Fuel Pressure Regulator	\$259.99

## IGNITION MODULES

### MSD GM HI-HEAT HEI MODULE

- Easily installs to non-computer controlled (4-pin) HEI housings
- Fits in stock HEI distributors
- Features built-in adjustable rev limiter
- Produces 8.5 amps

PART#	DESCRIPTION	PRICE
MSD83647	Hi-Heat HEI Module	\$163.99

### PROFORM IGNITION MODULE

- HEI style
- High-Performance 4-pin model
- Fits all GM applications 73-89
- Direct replacement for factory unit

PART#	DESCRIPTION	PRICE
PFM66944C	HEI High Performance Ignition Module	\$40.99

## GM HEI DISTRIBUTORS

### MSD STREET FIRE HEI DISTRIBUTOR

- Adjustable Centrifugal Mechanical Advance (Kit sold separately PN 8428)
- Welded weight Pins
- Supplied with internal coil and dependable 4-Pin Module
- Supplied Vacuum Advance Stop Plate to limit amount of vacuum advance
- Heavy Duty distributor gear for durability

## COILS AND ACCESSORIES

### MSD HIGH VIBRATION BLASTER COIL

- Produces 45,000 peak volts, and 140 milliamps to peak current. Protects against heavy vibrations

### MSD BLASTER 2 COIL

- This coil puts out 45,000 volts; 15,000 more than stock coils

PART#	DESCRIPTION	PRICE
MSD8222	High Vibration Blaster Coil	\$59.99
MSD8202	Blaster 2 Coil	\$49.99
MSD8213	Blaster Coil Bracket	\$12.99

### MSD HEI COIL

- This 42,000 volt coil has low inductance, and high temperature windings which charge the coil faster and increases your spark energy at higher rpm
- Replaces your stock coil

PART#	DESCRIPTION	PRICE
MSD8225	GM HEI Coil	\$112.99

### PROFORM HEI 50,000 VOLT COIL

- High-Performance, HEI In-Cap Mount Style
- Fits All Cap Mount HEI Distributors
- 50,000 Volt Coil Outputs 15,000 More Volts Over Stock Coil
- Fits GM/Ford/MOPAR Applications

PART#	DESCRIPTION	PRICE
PFM66943C	Blaster HVC Coil	\$36.99

### MOROSO HIGH-TEMP PLUG WIRES

- 8mm wires include a KEVLAR® core
- Extra-thick EPDM layer
- 350 ohms of resistance per foot, nickel copper alloy conductors
- Most powerful and RFI/EMI-resistant wires available
- High-temperature silicone boots that can withstand heat up to 600 degrees
- Coil wire included

**MOROSO**

### MOROSO SLEEVED WIRES

## STRANGE OVAL TWIST GUNDRILLED AXLES

While left and right side axles are different lengths they are normally the same diameter; this inherently gives the right side axle a lower spring rate. This means the left side axle does not "wrap-up" as much as the right side and the car has a tendency to steer right on initial acceleration because the left rear tire sees the power first. By using a smaller diameter left hand axle with the "Twist concept" you can equalize this torque steer reaction both under acceleration or deceleration.

## WILWOOD WIDE 5 HUBS

WILWOOD RACING

## STARLITE "55" REAR 1TON RACING HUB

- Starlite "55" hubs provide the superior strength of permanent mold, high-density aircraft aluminum at weights comparable to the much higher priced magnesium hub assemblies
- 5 bolt Drive flanges and snap-cap front hubs pare the 'loaded' weight of these hubs to being the lightest available

PART#	DESCRIPTION	PRICE
WIL270-16772BD	Starlite 55 1 Ton Rear Hub - Black (Drilled Studs)	\$206.99

## STARLITE "55" REAR RACING HUB

- Bearing, seals and spindle lock nuts are all interchangeable with conventional Wide 5 hubs
- The only required item when updating from an eight bolt hub is the new five bolt drive flange

PART#	DESCRIPTION	PRICE
WIL270-6513BD	Starlite 55 Rear Hub w/5 Bolt Cap & Drilled Studs - Black	\$191.99
WIL270-6513D	Starlite 55 Rear Hub w/5 Bolt Cap & Drilled Studs - Silver	\$175.99

## STARLITE "55" FRONT RACING HUB

- Snap-cap front hubs have had the flange bolt bosses removed, and the hub is machined to accept a fiber reinforced composite snap-cap hub cap
- Bearings, seals and spindle lock nuts are all interchangeable with conventional Wide 5 hubs
- Now with DRILLED STUDS

## LIGHTWEIGHT

Only 6.85 lbs.

### DETERMINING SEAT SIZE

A=WIDTH OF HIPS

The width of the hips determines the size of the seat. To measure the hips have the driver sit on a bench with his legs hanging over the side. Measure the width of the hips across the center line of the body side to side, but don't let the tape measure follow the curvature of the body (a yardstick works well).

- Upholstered padding on head reduces vibration and absorbs impact
- Available in 14" through 18.5" hip widths
- Bottom, shoulders, and head restraint have built in reinforcing to add to seat strength

## AFCO STOCK MOUNT SHOCKS

- These gas pressure shocks are built with the valving you need for racing, but are assembled in a "stock" configuration body to meet most track rules. The split-valve shocks offer additional tuning capabilities over the standard valving
- 1022 is a "split valve-easy up" shock used on the front to promote weight transfer under acceleration. This will enhance forward traction
- 1034 and 1035 are split valve shocks for rear applications. Soft compression accents weight transfer. In circle track applications, used on the left rear, these shocks tend to tighten corner exit handling. Used on the right rear, these shocks tend to tighten corner entry handling

### TECH TIP

All TUBE lengths are measured end to end of tube only.  
When adding heims, add approximately 3 inches for center to center on heims.

## BERT 2ND GEN TRANSMISSIONS

This revolutionary design is the lowest rotating weight gear box available. The mechanism of first and reverse are totally disengaged from rotation when in direct drive (high gear). Reduced rotating weight also creates more power to rear wheels.

SECOND GENERATIONS HOLD 1/2 QT. OF BERT BLUE MAGIC TRANSMISSION FLUID  
SHIFTERS SOLD SEPERATELY

## WELD WIDE 5 XL ALUMINUM WHEELS

STANDARD WHEEL  
BLACK OR CHROME COVER

BEADLOCK WHEEL  
BLACK OR CHROME COVER

- The Wide 5 XL wheel comes standard with 0.155" 6061-T6 alloy rim shells making them lightweight and strong
- The forged coined lug holes have three patterns to promote longevity and durability
- Weld continued shaving weight without comprising strength with its Ultra-Tab mud cover, which eliminates the Bead-loc ring but still retains the Bead-loc system

## 2004- Current Location

1980 - 1986

1987 - 2003

Performance Bodies was hit by several major floods, during an eighteen year span, at our second location. The creative staff used boats to get to and from work. Determined to maintain our Great Customer Service, boats, buses, and trucks were used to shuttle products to dry land where the UPS trucks patiently waited. This is the history of our WORLD FAMOUS SAME DAY SHIPPING.

## HISTORY - SCOTT AND FUZZY

In the spring of 1979 Fuzzy #27 and Scott #57 brought out the 2 cars they built together in Fuzzy's garage. Scott used a Nova body from Hansesn's junkyard while Fuzzy had a junkyard Camaro body minus the fenders. The pair on Fuzzy's car are the very first body panels produced at B&G Heating and Cooling.
